Terms B

As per Terms A all authorised non-labour expenses (travel, daily allowance, sales materials etc) are re-claimable afterwards through an expenses claim report. Otherwise and in the interim it falls to the Service Provider to cover any costs from his monthly \$4k “bankroll” budget. This was only NOT the case for NACAS 2022, since the conference was nearly all expenses paid, less some basic travel expenses and refreshment which were pre-authorised as being re-claimable e.g. \$70 general expenditure budget for food, bus, uber etc.

In Terms B these non-labour, direct expenses will instead be paid ontop of the bankroll amount. For both June's expenses unclaimed and the estimated expense claim for July. In June the unclaimed expense report is \$1.5k. And for July it is estimated to be in the region of \$3k, bringing the total current invoice amount to \$8.5k (\$4k (bankroll for July) + \$1.5k (unclaimed expenses June) + \$3k (forecasted expenses for July).

There is then an additional \$1.25k added, which relates to several other matters. Firstly the intial NACAS Conference quote, whereby the bid was for \$5k but was reduced to \$2.5k since the client was assured it was too high. One argument being, the exit Visa from DR to US would only be a few hundred dollars, when it ended up being circa \$1,250 USD. Secondly the Service Provider stayed behind after NACAS to be available to follow up on leads and explore and generate new opportunities. And in the week that followed NACAS, the Service Provider introduced the Client directly to his longstanding prospective certified US investors, whom has historically and recently invested millions of dollars in projects recommended by Sion's companies: DATRO Consortium (UK) and Scottish Bay LLC (US). This is also being pursued with no commission agreement in place. Also gained was an introduction to the dean of Rhode Island University and a second opportunity in Rhode Island for a state-wide deployment of the clients solution. All of which, has incurred said expenses.
